

Voice Reader Web

Sales angles:

- **Professional recording** of websites
- **Greater coverage and attractiveness** for your website
- **Option to download** the dynamically generated MP3 files
- **Also intended for mobile phone browsers**, to read websites aloud while on the move
- **Unbeatable price/performance ratio:** Prices start as low as **€ 19 per month!**
- Available in **15 languages**

Advantages for the website visitor:

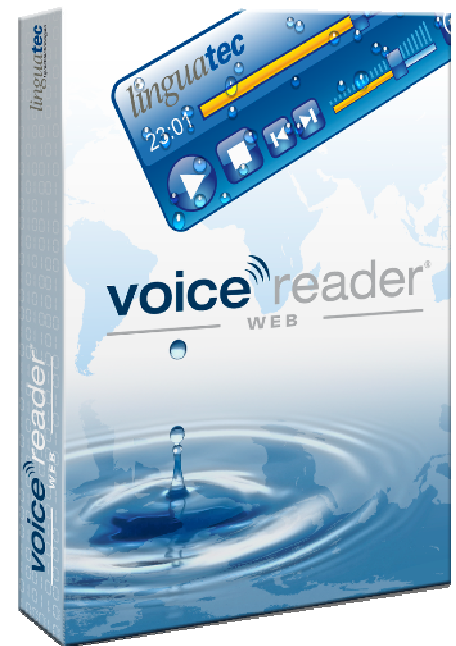

- Innovative TTS technology (Text-To-Speech) for **excellent voice output**
- **Audio added value:** according to a study by the University of Regensburg, efficiency increases by 44% when texts are read
- Also, **no waiting** with long texts, thanks to the special Split&Stream™ technology
- **Click & Play: No installation required** for the website visitors
- **Flexible navigation options**, in the Player, for example, pause, mute, back, etc.

Advantages for the Webmaster

- **Installing has never been easier**, no maintenance of audio files
- **Easy installation** by means of a web form
- **No time and effort required** for the creation, linking, etc. of audio files - an invaluable advantage for rapidly changing contents
- **Discretely placed "Read" link**
- Flash Player, exclusively developed for Voice Reader Web

Available in 15 languages
